PUBLIC OPEN HOUSE

to discuss the

Umatilla Transportation System Plan Update

You can help! We are seeking public input to help identify transportation issues and to determine where projects are most needed in the city.

The original Transportation System Plan was developed in 1999. Additions to the plan have occurred, but a true update to reflect current conditions is needed.

WHAT? The City is evaluating the current transportation system to identify improvements needed in the city. To update the plan, the project team is working to identify current and future improvements to address network connections, safety, and capacity issues and pavement condition.

WHY? Umatilla is growing! The current plan is outdated and the city is anticipated to grow by more than 30% to nearly 11,000 people by year 2045. The new plan will help determine how to use valuable resources to meet transportation needs now and in the future.

DATE Tuesday, July 12, 2022

TIME 5:00 to 7:00 PM

LOCATION Umatilla City Hall, 700 Sixth Street
